EXEMPTION

Application No. A9/2010

The Victorian Civil and Administrative Tribunal has considered an application, pursuant to section 83 of the **Equal Opportunity Act 1995**, by Museum Victoria. The application for exemption is to enable the applicant to advertise for and employ a male Aboriginal or Torres Strait Islander person in the position of Collection Manager – Indigenous Restricted Collection (the exempt conduct).

Upon reading the material submitted in support of the application the Tribunal is satisfied that it is appropriate to grant an exemption from sections 13, 14, 100 and 195 of the Act to enable the applicant to engage in the exempt conduct.

In granting this exemption, the Tribunal noted:

- The responsibilities of this position are to manage and care for the Indigenous Restricted Collection ('the Collection') within the Indigenous Cultures Department of Museum Victoria. The Collection includes ancestral human skeletal remains and secret-sacred material. That secret-sacred material comprises restricted ceremonial objects having ongoing religious and spiritual significance to Indigenous people. Much of this material relates to secret men's business or to ceremonies which are exclusive to men.
- Material in the Collection which relates to secret women's business is currently managed and cared for by a number of Indigenous female employees of the applicant, but there is a need for a similar position to have responsibility for the management of that part of the Collection which deals with secret men's business and ceremonial objects which are exclusive to men.
- The duties of the role of this position include working with and having access to materials mentioned above.
- It is essential that cultural protocols and the significant cultural values associated with this material be maintained and respected.
- The applicant wishes to demonstrate its commitment to reconciliation and to acknowledging and respecting the cultural protocols and values of Indigenous communities. It wishes to uphold the principle that it holds its Indigenous cultural materials in trust on behalf of the relevant Indigenous communities and with their consent. It takes account of the principle of deaccession and of repatriation of restricted materials in the management of its Indigenous Collection. By following these principles and commitments it wishes to strengthen its ties with Indigenous communities.

The Tribunal hereby grants an exemption to the applicant from the operation of sections 13, 14, 100 and 195 of the **Equal Opportunity Act 1995** to enable the applicant to engage in the exempt conduct.

This exemption is to remain in force from the day on which notice of the exemption is published in the Government Gazette until 10 February 2013.

Who may be engaged as a Cultural Heritage Advisor?

Section 189(1) of the **Aboriginal Heritage Act 2006** describes the requirements a person must meet in order to be engaged as a Cultural Heritage Advisor under the Act. The section states:

 - (a) is appropriately qualified in a discipline directly relevant to the management of Aboriginal cultural heritage, such as anthropology, archaeology or history; or
 - (b) has extensive experience or knowledge in relation to the management of Aboriginal cultural heritage.

Appropriate qualifications for Cultural Heritage Advisors

The Minister for Aboriginal Affairs has decided pursuant to section 189(2) of the Act, after consultation with the Aboriginal Heritage Council, to make these guidelines specifying the following appropriate qualifications for the purposes of s. 189(1)(a) of the Act:

- a degree in anthropology, involving studies in Australian Aboriginal culture, to at least Honours level; or
- a degree in history, involving studies in Australian Aboriginal history, to at least Honours level; or

Note: Regulation 61(3) specifies that a disturbance or an excavation for a complex assessment must be supervised by a person appropriately qualified in archaeology and be carried out in accordance with proper archaeological practice.

Importance of appropriate qualifications

These specified appropriate qualifications will help to ensure that cultural heritage management plans comply with the prescribed standards when submitted to a Registered Aboriginal Party (RAP) or to the Secretary for evaluation, and that cultural heritage audit reports are completed to a satisfactory standard.

NOTICE PURSUANT TO SECTION 50E
Country Fire Authority Assessment Guidelines
(Neighbourhood Safer Places)

Pursuant to section 50E of the **Country Fire Authority Act 1958**, the Authority may issue Guidelines (the Country Fire Authority Assessment Guidelines) in relation to Neighbourhood Safer Places.

The Authority has issued the following Interim Assessment Guideline (2009/10 Fire Season) (also published on the Authority's Internet site, www.cfa.vic.gov.au) for the purpose of assessing a place as suitable to be a neighbourhood safer place.

Interim
Assessment Guideline
(2009/10 Fire Season)

Version 3.1 – October 2009

NEIGHBOURHOOD SAFER PLACES PLACES OF LAST RESORT

INTRODUCTION

Neighbourhood Safer Places are an area or premises that may, as a last resort, provide some sanctuary from the life threatening effects of a bushfire (i.e. direct flame contact or radiant heat). It is envisioned it would be an existing space or structure, (such as an oval or a building) that may protect a person against fire.

This assessment guideline articulates the process by which qualified/experienced CFA Officers assess the suitability of Neighbourhood Safer Places and is not intended for use by the general public.

BACKGROUND

Reducing the impact of bush fires is a shared responsibility between government, emergency service organisations and the community. The community has an integral role to take the necessary steps to prepare their property and to implement their bushfire survival plan.

The intent of this document is to set out criteria for assessment of Neighbourhood Safer Places. The criteria intend to provide a framework to identify Neighbourhood Safer Places that will provide a place of last resort for people to gather during the passage of a bushfire front. The primary purpose of a Neighbourhood Safer Place is the protection of human life from a bushfire.

The 2009 Victorian Bushfires Royal Commission Interim report stated that people need a range of options to increase their safety in the event of bushfire. The Royal Commission identified three options (pg 209). They are:

- community fire refuges
- Neighbourhood Safer Places
- privately identified safer places

In identifying these options the Royal Commission noted that safer places were plan B and plan C that would be used in the event of failure of a person's primary bushfire plan. It noted that safer places "*may increase a persons chance of survival, but still entail some risk, both in moving to them during a fire and while sheltering in them. They cannot be considered, nor should they be described as, 'safe'.*" (p.209)

Fire refuges can further be described in the OESC Fire Refuges in Victoria – Policy and Practice (2005). However, these guidelines are currently undergoing a review with the OESC and because the issues associated with fire refuges are being considered separately, they will not be considered further in this document.

CONCEPT

- A Neighbourhood Safer Place is a space which is a place of last resort for individuals to access and remain in during the passage of fire through their neighbourhood without the need to take a high risk journey. It is intended to provide a place of relative safety, but does not guarantee the survival of those who assemble there, and should only be accessed when personal bushfire survival plans cannot be implemented or have failed.
- The Neighbourhood Safer Place is an area that provides a level of protection from the immediate life threatening effects of a bush fire (direct flame contact and radiant heat).
- Neighbourhood Safer Places are a place of last resort to be at during the passage of the fire front, if their personal bushfire survival plans cannot be implemented or have failed.
- Neighbourhood Safer Places should be recorded in Township Protection Plans.
- Not all townships will have Neighbourhood Safer Places identified in these Plans because specific criteria identified in this document may not be met.
- It is important to understand that Neighbourhood Safer Places are not to be confused with Fire Refuges, Relief Centres, Recovery Centres, Assembly Centres, or Informal Places of Shelter each has a different and specific purpose.

LIMITATIONS

- They have a limited capacity and do not guarantee safety.
- They do not cater for animals.
- Persons using Neighbourhood Safer Places should not always expect emergency services to be present.
- They do not provide meals amenity or special needs (eg for infants, the elderly, the ill or disabled).
- They may not provide shelter from the elements, particularly flying embers.

The Neighbourhood Safer Place should meet the following criteria:**Specific Criteria**

- 1) Neighbourhood Safer Places should provide a safer level of protection for people from lethal levels of radiant heat by providing an appropriate separation distance between fire hazards, particularly vegetation and the site of the Neighbourhood Safer Place. Such an appropriate separation distance may include isolated fire hazards, an example may be an individual tree as long as such hazards do not add to a fires rate of spread nor influence the radiant heat impacting on the Neighbourhood Safer Place.

If a Neighbourhood Safer Place is an open space, the appropriate separation distance should be greater than **310 metres** (*) from the outer edge of the NSP to the fire hazard or should be prescribed to ensure the maximum potential radiant heat impacting on the site is no more than 2kw/m^2 (**).

If a Neighbourhood Safer Place is a building, the appropriate separation distance should be greater than **140 metres** (*) from the outer edge of the building to the fire hazard or should be prescribed to ensure that the maximum potential radiant heat impacting on the building is no more than 10kw/m^2 (**).

NOTE: The appropriate separation distances as prescribed relate to locations where extreme fuel hazards adjoin the Neighbourhood Safer Place. It is recognised that in certain situations this separation distance could be reduced and still fall inside the radiant heat criteria as specified above.

* The lengths are to assist in providing some initial direction to CFA staff and others of the suitability of potential suitable Neighbourhood safer places,

** The consideration of the radiant heat measures is based on fire industry collaboration of suitable criteria for a safer place. It is based on the view however that each Neighbourhood Safer Place needs to be assessed on its merits and should be calculated according to an appropriate assessment tool. The NSW Rural Fire Service Site Bush Fire Attack Assessment Methodology (Douglas and Tan, 2005) is the assessment tool for these guidelines.
