Item number 860 has satisfied primary criterion 7.1 as it no longer satisfies the original criteria for listing (1.2 and 1.2.1). National Herbarium of Victoria records for Rare Bitter-bush indicate the widely spread nature of the taxon's Victorian distribution and show that it is well represented in conservation reserves (e.g. Wilsons Promontory NP). The current distribution, expanded as a consequence of taxonomic revision, has the taxon occurring in at least 15 ten-minute grids.

Item number 861 has satisfied primary criterion 7.1 as it no longer satisfies the original criteria for listing (1.1, 1.2 and 1.2.1). Western Water-starwort is no longer recognized as a distinct species by the National Herbarium of Victoria and is now considered to be a synonym of Winged Water-starwort (*C. umbonata*). *Callitriche umbonata* was nominated in 2003 but was not supported for listing at that time.

Item not supported for listing

In accordance with section 14 of the Act, the SAC has made a preliminary recommendation not to support the nomination of the following item for addition to the Threatened List.

Eligibility for listing is outlined in section 11 of the Act and criteria by which the eligibility for listing is determined are outlined in the Flora and Fauna Guarantee Regulations 2011.

Notes on Tables 1 and 2:

- Seasonal determinations may be made in intervals of 1% by interpolation between the values shown or extrapolation below 10% (or above 100% for the losses), not just in the 10% intervals shown.
- Murray Valley and Torrumbarry have fixed losses of 63,247 GL and 50,892 GL (including 0,352 GL for Tresco) respectively, plus two variable loss components as follows:
 - for high-reliability rights, variable loss varies from zero at zero allocation, increasing linearly to 10,436 GL for Murray Valley and to 16,301 GL for Torrumbarry at an allocation of 100%;
 - for low-reliability rights, variable loss varies from zero at zero allocation, increasing linearly to 48,033 GL for Murray Valley and to 52,034 GL for Torrumbarry at an allocation of 100% to low-reliability entitlements; and these losses may be allocated as required to deliver water carried over in these irrigation areas based on the equivalent maximum allocation in each area (calculated as the seasonal determination + carryover).
- Allocations against the 22.1 GL of high-reliability entitlement added to Table 1 in November 2009 for Snowy EWR commenced when the Lake Boga-Lake Kangaroo-Lake Charm component of the Victorian Mtd-Murray Storages was first deemed by the Resource Manager to have been operated in accordance with clause 8A (which occurred on 1 April 2010).
- Broken Creek entitlements are generally supplied from the Goulburn System, including town supplies for Numurkah and Nathalia and relevant environmental entitlements, hence are not included in Tables 1 and 2, but receive Murray allocation regardless of whether they are supplied from the Murray or Goulburn System.
- The allocation to the Murray Valley and Torrumbarry losses shown may be increased up to the maximum accumulated unused loss volume available for each in order to allow for delivery of allocation carried over in these districts from the previous year.
- These tables do not show changes in water share volumes as a result of trade since 6 March 2015, or entitlements to unregulated flows in the River Murray or River Murray Increased Flows.
- LMMURW Irrigation Districts volume includes high-reliability and supply by agreement entitlements in Table 1.
