**Standard Tariffs – Victoria**

These standing electricity tariffs are to take effect on and from 1 July 2019, and until such time as the tariffs are varied, apply to the sale and supply of electricity to relevant customers, pursuant to section 35 and 39 of the **Electricity Industry Act 2000**. Rates subject to confirmation of distribution zone and meter type at your supply address. The main reason for the variation of our standing offer tariffs is the introduction of the Victorian default offer in respect of flat tariffs.

The weighted average tariff variation for affected residential electricity customers is a decrease of 17.3%. The weighted average tariff variation for affected small business electricity customers is a decrease of 1.4%.

**Standing Offer Charges**

The following tariffs apply to the sale of electricity in accordance with section 35, section 37 and section 39 of the **Electricity Industry Act 2000** and are effective from 1 July 2019.

The weighted average decrease is 21.8% for residential electricity tariffs and 24.2% decrease for affected small business electricity tariffs

Changes to the residential flat and controlled load tariffs and flat small business tariffs have been made to reflect the introduction of the Victorian Default Offer. Origin has also decided to reduce all other residential tariffs and the controlled load tariffs for small businesses to ensure tariff reductions are applied more broadly.

**Applicability of rates:**

Rates subject to confirmation of distribution zone, meter type and configuration, and details of supply address. Guidance regarding applicability is set out below.

**Single Rate tariffs:**

These tariffs consist of a daily supply charge, and then a per kWh energy rate which is the same at all times of the day, 24 hours a day. These tariffs do not have any ‘Off Peak’ rates but Controlled Load rates may apply. This tariff is the basic network tariff for general usage for most cases. Block One rates are applicable for the first 1020 kWh of usage per quarter. Block Two rates are applicable for all usage after the first 1020 kWh of usage per quarter.

**Controlled Load rates:**

Rates for time switch controlled hot water services, space heaters and other dedicated loads, generally controlled between 11 pm and 7 am.

**Electricity Industry Act 2000**
