PROPOSED MINERAL RESOURCES (SUSTAINABLE DEVELOPMENT) (EXTRACTIVE INDUSTRIES) REGULATIONS 2019

Notice of Preparation of Regulatory Impact Statement

Notice is given in accordance with section 11 of the **Subordinate Legislation Act 1994**, that a Regulatory Impact Statement (RIS) has been prepared in relation to the proposed Mineral Resources (Sustainable Development) (Extractive Industries) Regulations 2019 (the proposed Regulations).

Objectives

The proposed Regulations further the objectives of the **Mineral Resource (Sustainable Development) Act 1990** (the Act) to encourage economically viable extractive industries that make the best use of stone resources, compatible with the economic, social and environmental objectives of the State.

The proposed Regulations:

- prescribe various procedures, details, royalties, fees, forms, information required in documents and other matters authorised by the Act; and
- prescribe certain offences as infringement offences; and
- set out requirements relating to declared quarries.

The regulations are necessary because the Act requires that certain matters, forms and procedures be specified in them to enable compliance with the Act. The proposed Regulations are made under section 124 of the Act. In addition to the regulation making power in section 124 of the Act, the Act contains numerous other provisions that require certain matters to be set out in the regulations

The proposed Regulations will largely remake the existing Regulations, with a number of improvements to streamline and modernise the regulations and set clearer work plan and rehabilitation plan requirements to better manage risks associated with extraction of stone.

The RIS examines the costs and benefits of the proposed Regulations and possible alternatives and concludes that the proposed Regulations are the most efficient method of achieving the objectives mentioned above.

Submissions

Public comment is invited on the proposed Regulations and RIS.
